

ASUS MAMS

About **ASUS MAAS**

ASUS MAAS is committed to develop products and services that aims to revolutionize the way people access and use transportation.

Our extensive expertise in AIoT technologies, coupled with our dedicated team of engineers and researchers, enables us to develop emerging solutions that transform the way parking is managed and payments are processed.

CG 632SR

Furthermore, with the integration of smart parking technology, electric vehicle (EV) charging has never been more convenient and efficient.

We seamlessly combine smart parking and EV charging infrastructure to maximize the efficiency of parking spots with charging stations.

We focus on the two main aspects of

- **Smart parking system & Multiple payment kiosk**
- **Smart electric vehicle charging solutions**

Application Scenario Description

Solution A

Off-Street Parking Lot

Parking Lot Gateway / ALPR /
Occupancy Detection / Payment /
EV Charging

Z-Spotter

Gateway
Box

All-In-One
EV Charger

Payment
Kiosk

Solution **B** Parking Lot

Parking Lot Gateway / ALPR /
Occupancy Detection / Payment /
EV Charging / Reservation

X-Spotter

**Gateway
Box**

**11KW
EV Charger**

**Payment
Kiosk**

Solution **C** Community / Building Parking Lot

Parking Lot Gateway / ALPR /
Occupancy Detection / Payment /
EV Charging / Reservation

X-Spotter

**Gateway
Box**

**11KW
EV Charger**

**All-In-One
EV Charger**

Solution **D**

Roadside Parking Lot

Parking Lot Gateway / ALPR /
Occupancy Detection / Payment /
EV Charging

Z-Spotter

Roadside
ALPR Bollard

All-In-One
EV Charger

Payment
Kiosk

Product Lists

Roadside ALPR Bollard

ALPR / Occupancy Detection /
Payment

All-In-One EV Charger

ALPR / Occupancy Detection / Payment /
EV Charging / Indicator Light

EV Charger / 11kW

Cardless Unlock / EMS /
Payment / EV Charging

EV Charger DC120S

Voltage Range 200-1000V DC /

CCS1 & CCS2 / OCPP 1.6J /

Cable Management System Compliant with ADA

Embedded Spotter

ALPR / Occupancy Detection
Indicator Light / AI 2.0

Payment Kiosk

Online Payment / QR Code /
Credit Card / E-Ticket

Gateway Box

ALPR /

Parking Lot Gateway Control System

X Spotter

ALPR / IVS / Occupancy Detection /
Dual Cameras / Indicator Light /
AI 2.0

X Spotter

Sentry Mode
Multi Detection
For 1~8 Vehicles

POWERED BY

ASUS IoT

Case Study

Taichung City Hall Garden Parking

Equipped with **899** parking spaces, **31** for charging spaces

X-Spotter

x **192**

Gateway Box

x **8**

11KW EV Charger

x **31**

出口 Exit

Smart Parking Lot

ALPR / IVS / Occupancy Detection /
Sentry Mode

Hanshin Department Store

Equipped with **710** parking spaces, **35** for charging spaces

X-Spotter
x **175**

Gateway Box
x **4**

11KW EV Charger
x **35**

Reserve Charging Parking Space Service

The parking reservation system guides drivers to their reserved spots through screen displays.
